

EXCLUSIVE: Email Reveals Why CDC Didn't Issue Alert on COVID Vaccines and Myocarditis

CDC officials were worried about causing panic.

The nation's top public health agency didn't send an alert about a connection between COVID-19 vaccines and heart inflammation because officials were concerned they would cause panic, according to an email obtained by The Epoch Times.

The U.S. Centers for Disease Control and Prevention in 2021 drafted an alert about the risk of heart inflammation, or myocarditis, resulting from Pfizer-BioNTech and Moderna COVID-19 vaccines. Officials prepared to release it to the public, taking steps including having the agency's director review the language, internal documents show.

The alert would have been sent through the CDC's Health Alert Network (HAN), which goes to state and local officials, as well as doctors, across the country.
