

Google Warns Staff About the Risks of Its Own Chatbot, Bard

Google parent company Alphabet told employees to avoid entering confidential information into chatbots and warned them about the risks of AI tools including its very own chatbot Bard.

Alphabet also advised engineers against directly utilizing code provided by chatbots. While bots can, in fact, produce certain code, they run the risk of introducing errors or producing “undesirable” suggestions.

Alphabet’s not the only one warning against careless chatbot use. Samsung’s gone so far as to flat-out ban company employees from using external generative AI solutions on company devices. Samsung, while creating in-house alternatives to keep productivity on the up, maintains an indefinite ban on third-party generative AI use to avoid proprietary data being unwittingly fed to outside parties.
