

Iceland shaken by more than 50,000 earthquakes in three weeks

Iceland has recorded more than 50,000 earthquakes in the past three weeks.

This unusual activity indicates a volcanic eruption is on its way.

Scientists are baffled over when it will happen and Icelanders are learning to live with the shakes.

BBC Europe correspondent Jean Mackenzie visited the area.

Video produced by Kate Vandy. Filmed and edited by Xavier Vanpevenaeghe.
