

IDF Discovers Hamas, Islamic Jihad Command Center at UNRWA HQ

The Israel Defense Forces (IDF) discovered a command center this week used by Hamas and Islamic Jihad terrorists within the Gaza City headquarters of the United Nations Relief and Works Agency (UNRWA).

Israel has long insisted that UNRWA supports terrorism in general, and maintains that several UNRWA employees participated directly in the October 7 terror attack. Terrorists have repeatedly used UNRWA facilities to launch attacks and store weapons.

The IDF said in a statement:

Following intelligence indicating that Hamas and Islamic Jihad terrorists and infrastructure were embedded inside the UNRWA Headquarters in Gaza City, IDF troops began a counterterrorism operation in the area earlier this week. At the start of the operation, the IDF opened a defined corridor to enable civilians to evacuate from the area.

During the operation, the Commando Brigade Combat Team under the command of the 99th Division conducted a targeted raid on a Hamas combat complex embedded inside a compound previously used by UNRWA. With the guidance of the Intelligence Directorate (J2), Maglan and Egoz special forces raided the compound and apprehended terrorists who tried to escape from the area.
