

# No, That's Wrong: Google's Bard AI Demo Spouts Incorrect Info

**The demo includes an inaccuracy about the James Webb Space Telescope, underscoring the misinformation risks of using Bard and ChatGPT to refine search.**

As Google's AI-powered Bard prepares to compete against ChatGPT, don't count on the chatbot programs always being right: A recent demo of Bard shows it spouting inaccurate information.

Bard, which Google announced on Monday, is slated to arrive in the coming weeks. To promote the AI program, the company posted a GIF(Opens in a new window) on social media that shows Bard answering a question about what new discoveries NASA's James Webb Space Telescope has made.

The program lists three discoveries the space telescope made in an easy-to-read, bulleted format. Hence, through Bard, a user can quickly learn information, without having to scroll through a long list of search results to find the applicable site.

The only problem? Astronomers were quick to point out(Opens in a new window) one of the listed facts that Bard generated is wrong.
